

AMENDMENTS

In the Specification:

Please replace paragraph 0031 of the Specification with the following paragraph –

C/

--An underlying principle on which the present invention is based is that the airbag 12 and the gas generator 13 are arranged in the steering-wheel 1 so that the bowl-shaped element, which is defined by the shell parts 5, 7 and the ledge 6, forms a casing or an enclosure for the airbag 12 and the gas generator 13. More precisely, the wall sections 5, 6, 7 of the bowl-shaped element form, at least partly, a housing for the gas generator 13 as illustrated in Figure 3, thereby forming a part of the gas generator 13. In this way, an effective utilization of the space in the steering-wheel 1 and a low weight of the steering-wheel 1 itself are provided.--

Following please find a MARKED UP VERSION OF PARAGRAPH 0031 OF THE SPECIFICATION showing all changes made relative to the previous version of that paragraph –

--An underlying principle on which the present invention is based is that the airbag 12 and the gas generator 13 are arranged in the steering-wheel 1 so that the bowl-shaped element, which is defined by the shell parts 5, 7 and the ledge 6, forms a casing or an enclosure for the airbag 12 and the gas generator 13. More precisely, the wall sections 5, 6, 7 of the bowl-shaped element form, at least partly, a housing for the gas generator 13 as illustrated in Figure 3, thereby forming a part of the gas generator 13. In this way, an effective utilization of the space in the steering-wheel 1 and a low weight of the steering-wheel 1 itself are provided.--
